ROCKETDOGE WHITEPAPER

2021 MAY

POWERED BY

TABLE OF CONTENTS

1. ABSTRACT

Blockchain technology has been surrounding our environment since 2000s'. Besides the technology of it, the assets can be built on it, called crypto currencies, are heading towards the future and creating a unique financial ecosystem. Thus, both this blockchain technology and the crypto currencies are attracting too many people such as investors, politicians, regulators etc.

RocketDoge is a token that was built on Binance Smart Chain network and aims to make people send money fast and with low fees. RocketDoge was built by the people that imagines beyond being a "memecoin" such as Doge Coin.

2. TECHNICAL DETAILS

- RocketDoge is a BEP20 token was built on Binance Smart Chain with a maximum total supply of 1,000,000
- RocketDoge's smart contract is verified on Binance Smart Chain.
- Smart Contract does all the functional verifications and the transactions can be seen by everybody. Due to the nature of the blockchain, the smart contract cannot be encrypted.
- Unsold tokens on presale phase will be burnt and the transaction of it will be published to the community.

3. OUR PRINCIPLES

3.1.   Personal Transparency

We are not anonymous. The LinkedIn profiles of the team members can be seen on our website.

3.2.   Financial Transparency

For the sustainability of the RocketDoge project, there is a funding wallet 5% of the total token amount the besides the presale token amount and listing amount. These wallets can be trackable by anyone.

3.2.1.   Funding Wallet (5% of total supply)

10% To Partners: 10% of the funding wallet amount will be airdropped to the partner crypto holders as well as once the RocketDoge launches.

10% To Giveaways and Airdrops: There will be giveaways and airdrops to the people so that recognition of RocketDoge will elevate and the project can collect more investment.

20% To Innovation and Development: Through the innovation and development funds we can afford the technical developments in the future. Such as building more complex products.

%20 To Foundation and Team: There would be more people in the team in time for a better project management. This funds will be used for the team's costs. All the wallets of the team can be tracked.

40% To Marketing and Promotion: This funds will provide the finance for the marketing and future plans, such as exchange listings.
3.3.   Community Driven Project

- The community mostly will lead the way of the project. For example, the community will vote a poll and will decide how much should be the soft and hard cap on pre-sale.
- Frequently there will be video and voice AMAs.

4. ECOSYSTEM

The $RD token was built on Binance Smart Chain. Reason why ERC–20 (Ethereum) chain hasn't been picked for the project is that BSC is a way more fast and has lower transaction fees. Also there is no tax fees in the token except for the blockchain.

5. TOKENOMICS

Unsold tokens on presale phase will be burnt.

6. THE PRODUCT

RocketDoge has a lottery product that people can deposit $RD tokens and they can win prizes as $ RD at the end of each turns.

Principles of the first lottery product:

- Each contributor has the same allowed amount of $RD can deposit for each lottery.
- Number of the contributors is unlimited.
- Minimum number of the winner is 1 but it can be increased by contributors count. For example: +1 winner for each 100 contributors.
- For each lottery turn, there will be 10% fee charged by the RocketDoge.
- For the special days the chances of the win ratio will be elevated.

7. DISCLAIMER

All information provided in this whitepaper, website (RocketDoge.net) and RocketDoge communities is provided solely for educational purposes and should not be perceived as financial advice. Trading cryptocurrencies/digital assets is a high-risk, high-volatility activity.
